The American reply is chiefly characterized by its firm tone and its brevity. Its keynote is the president's attitude as laid down in the American note of July 3, and there is the strictest adherence to the points enunciated at that time. The United States places itself in the position of being ready at the affairs in the empire, the lack of knowledge as to who are the responsible rulers and what constitutes the actual Chinese government, it is made clear that the time has not arrived for pursuing the negotiations proposed. The formal courtesy of diplomatic procedure is preserved, but at the same time the entire tener of the document is marked by force and firmness. It is stated, however, that the reply is a step in the direction of opening negotiations.
